# RESOURCE LIST

## ART

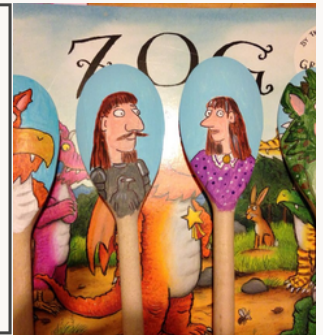

Art is a fun and creative way for children to explore and express themselves. Art sparks curiosity, encourages new ways of thinking, and provides a safe space to share feelings.

Through art, children discover their talents and learn to appreciate the beauty and variety in the world.

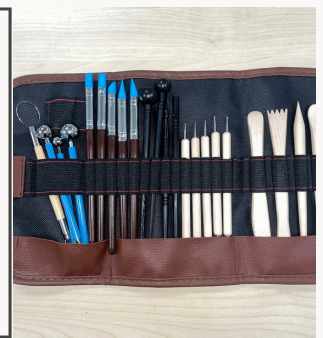

### STORY INVITATIONS

Story invitations are activities or setups designed to spark children's imagination and engage them in storytelling. These invitations often involve creating a space, scene, or offering materials that encourage children to create or act out their own stories.

### SCULPTING AND 3D MATERIALS

Sculpting and 3D materials provide children with hands-on opportunities to explore creativity and develop fine motor skills. Incorporating tools like wooden bases, carving tools, and plaster strips enhances the experience, enabling children to create more intricate designs.

### ART PROVOCATIONS

Art provocations invite children to explore creativity through open-ended, intentional setups that spark curiosity and inspire self-expression. By offering a variety of materials such as paints, brushes, textured papers, or natural elements, children are encouraged to experiment and create in their own unique ways.
